EDUCATION

Texas A&M University – College Station, TX **Expected May 2028**

Bachelor of Science in **Computer Engineering** | Minor in **Mathematics**

- **3.5/4.0 GPA**
- Relevant Coursework: Introduction to Digital Systems Design, Electrical Circuit Theory, Discrete Structures for Computing, Program Design & Concepts, Computer Architecture & Design, Data Structures & Algorithms

SKILLS

- **Programming & HDL:** Python, C++, Java, Verilog, ARMv8 Assembly
- **Hardware & Embedded Platforms:** ESP32, NVIDIA Jetson Nano, Raspberry Pi
- **Computer Vision & Software:** GitHub, Git, Linux, YOLOv8, Roboflow, TensorRT
- **Engineering Tools:** SolidWorks, Fusion 360, AutoCAD, Vivado, LTspice
- **Lab Equipment:** Oscilloscopes, Logic Analyzers, Multimeters

EXPERIENCE

Software Engineer Intern, DataTraders LLC | Houston, TX May 2026 - August 2026

- Built a real-time Python pipeline using **websockets** and **asyncio** to stream live market data from Charles Schwab API.
- Used **pandas** to process incoming data, calculate account equity, and generate insights supporting options-trading decisions.
- Developed a continuously running monitoring script to track portfolio health and active positions.

Peer Teacher, Texas A&M College of Engineering | College Station, TX Aug 2025 - Dec 2025

- Mentored 100+ students in a Python engineering course (ENGR 102) through weekly lab sessions and office hours.
- Helped students debug Python programs and understand programming concepts through technical feedback.

Engineering Intern, CMC Tech Inc. | Houston, TX May 2025 - August 2025

- Designed custom camera casings and mounts for **NVIDIA Jetson Nano** and **Raspberry Pi** platforms using SolidWorks.
- Deployed wireless camera networks at residential complexes, configuring access points and repeaters to support camera connectivity.

PROJECTS

Luma-Fume – Autonomous Soldering Assistant TAMUHack 2026 | **Best 3D Model Design Winner**

- Developed a computer-vision system on an **NVIDIA Jetson Nano** that tracks a soldering iron tip for an autonomous soldering assistant.
- Implemented servo-control code that mapped webcam observations to **3D target coordinates**, positioning two robotic arms through a **PCA9685 servo controller**.
- Integrated **TensorRT** to reduce vision-processing latency, improving target tracking and producing visibly smoother arm movement during testing.

Gesture-Grip – Gesture-Controlled Soldering Helping Hands IEEE Technothon 2025 | **First Place Winner**

- Designed a multi-joint robotic arm assembly in **SolidWorks** for a soldering aid that let users select and adjust joints through touch-free hand gestures.
- Led physical assembly and iterative testing, resolving structural instability to improve arm stability.

Munchie Crane – Claw Machine Keychain Shelf Bambu Lab "Living in the Gallery" Contest (May 2026) | **Winner**

- Designed and 3D printed an award-winning claw-machine-inspired wall shelf using **Blender** and **Fusion 360**, incorporating a ball-jointed joystick and interactive switch buttons.
- Won a Bambu Lab X2D Combo (valued at $899.00 USD).

ACTIVITIES

- **Etsy Shop Owner** - Created original stickers and keychains; earned 4,600+ sales and 4.9-stars across 1,000+ reviews.
- **IEEE TAMU -** Semiconductor Summit 2026 Volunteer: designed advertisement and sponsor flyers for the event
